# Optimized Wellness for Body & Mind

## POD Wellness Technologies

The **RelaxWell POD Deluxe** incorporates powerful wellness features that automatically deliver twenty-two (22) pre-set programs. These features include a vortex-fusion of convection and conduction dry heated air adjustable up to 190°F radiant infrared heating, dual vibratory whole body, back and leg massage, soothing back heat system, comfortable ergonomic bed and head cushions, natural essential aroma diffusion and pure Himalayan salt air throughout the POD, along with integrated music speakers, and cooling facial air fans to keep the client's face and neck cool for maximized long session times. A stand-alone enriched air O<sub>2</sub> con denser is included to freshen the face air and humidity (with essential oils and/or salt air) can also be added for enhanced wellness optimization.

*The RELAXWELL POD Deluxe  
Enhances Wellness for Everybody!*

Dynamic Convection Air Shower Heat Ports

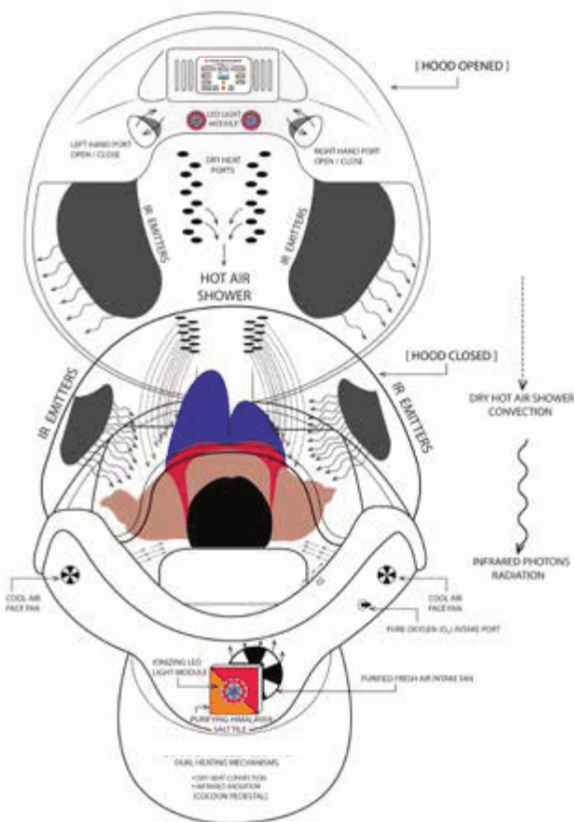

## Dynamic Convection Dry Heat

The **RelaxWell POD Deluxe** dry heat air system utilizes a powerful fan and proprietary “air shower” heat port configuration that circulates a dynamic vortex of warm air throughout the body chamber by means of convection. The air inside the cabinet is heated and dispersed, evenly and safely. The **RelaxWell POD Deluxe** software enables the user to adjust the cabinet temperature to any desired level, ranging from ambient room temperature up to 194°F (90°C). The warmed air flows downward to the body from a pattern of hood ports while fans draw the warm air currents equally across the body in a flow that creates the desired temperature level and increases core (body) temperature. As the body responds to the warm chamber environment, the relaxing release of body heat triggers the cleansing perspiration process that helps maintain a stable core temperature.

## Infrared (IR) Radiant Heat

Users can use the infrared wellness heat system separately or together with dry heat air for the ultimate total body conditioning. The IR heat energy is absorbed by the water in the body tissue and transmitted through the body by conduction.

Many users enjoy infrared heating because the infrared heats the body without heating the air inside the body chamber. When the infrared heat system is used without the dry heat air system, the air inside the cabin remains relatively cool and users can receive benefits without heating the air itself. The **RelaxWell POD Deluxe's** dual heat system is unique for a superior wellness experience. The combination of a dry heat air convection system and a radiant infrared heat conduction system is a unique wellness feature.

## Soothing Vibration Massage

Dual vibration transducers located under the contour bed can be controlled and adjusted to achieve soothing and invigorating back and leg massage or customized massage vibration. The massage intensity settings can be adjusted from low, mild, strong, intense to maximum vibration. Users can select their own personal vibratory massage levels for immediate stress relief, relaxation, soothing and relieving aching muscles, better sleep or refreshing power naps.

Cooling Face Air System

## Cooling Face Air System

The **RelaxWell POD Deluxe** System allows users to adjust the rate and direction of cool airflow upon the face and neck for comfort during high heat sessions. The enriched-O<sub>2</sub> air freshens every session while a continuous stream of adjustable cool air enhances the users enjoyment of each session.

## LED Body Chamber & Facial Light System

Twenty-five (25) colorful light modules systems are built into the body chamber and facial area, the exterior and pedestal of the Relaxwell Deluxe.

Each light module station has 45 non-thermal red, yellow, blue and green LEDs, plus near infrared. The distinct colors can be combined and blended to achieve an infinitely exciting palette of beautiful color hues.

The Body and Face Chromo-Light modules can be auto-programmed and synchronized or separately controlled to simultaneously segment and provide different colors to the body chamber and the facial system.

The embossed translucent acrylic used in the POD windows, privacy visor and facial area makes the colorful lights fill the body chamber and prism like diamonds to enhance the mood and ambiance of every session and room.

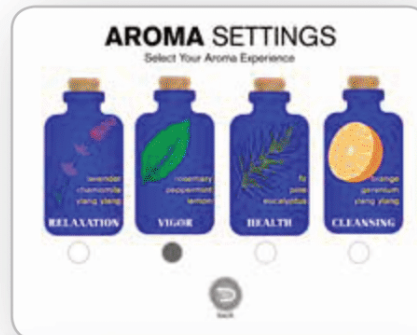

## Contour Ergonomic Bed with Built-in Heat System

The vibration massage bed is ergonomically contoured and padded with foam cushioning to provide the most comfortable and ergonomic user experience. Evenly cushioned support eliminates any pressure points and provides the feeling of floating comfortably in the air. The ergonomic bed has a heat system for ultra-relaxation and relief to the back, legs and/or whole body.

## Aroma System

The **RelaxWell POD Deluxe** aroma system enables users to choose essential oil scents for heightened vigor, health, relaxation, or cleansing. Scented air flows over the body and face and fills the air in the body chamber. The user's olfactory senses will be stimulated for the enhancement of all sessions. The numerous benefits of aromatherapy include relaxation, health, beauty and total well-being.

## Himalayan Pure Ionic Crystal Salt:

POD users can experience the benefits of traditional salt caves found in Europe and salt rooms which have recently emerged across the United States. A 6" x 6" tile of Himalayan pure ionic crystal salt is mounted near the air intake fan to provide clean and refreshing salt air. Salt air or "halotherapy" has long been practiced as a traditional holistic wellness experience and the POD becomes the user's very own salt cave, to relax, recharge and rejuvenate!

Himalayan Pure Ionic Crystal Salt

## Calorie Indicator

The smart software also includes a wellness option for tracking and displaying the approximate number of calories burned during sessions. This feature works by inputting the user's body weight and calculating the duration of the session and temperature levels utilized during the session.

## Designed for Comfort:

### Core Body Heating – Head & Face Cooled

The **RelaxWell POD Deluxe's** innovative design keeps the head outside the heat cabinet during the session where flowing, refreshing salt-air purifies the air and cools the head and facial areas. While most people can only endure a few minutes in an enclosed sauna, this feature keeps the face, head and hair cool and lets you experience and enjoy the benefits of the Thermal Dynamic Energy generated inside the POD (up to 190°F) for extended periods of time.

The robust fiberglass shell has a clear germicidal gel coat that resists stains and polishes to a beautiful glossy finish for greater durability and tremendous heat insulating qualities superior to plastics or acrylics. The natural and futuristic design of the **RelaxWell POD Deluxe** is considered a beautiful classic masterpiece, and has been awarded international design awards.

Micro Mist  
Air Spray Brush  
(Silver Plated)

### Enriched-O<sub>2</sub> Air System

The **RelaxWell POD Deluxe** includes air intake ports and for use with the optional stand-alone OxyOasis concentrator (pictured at left) to refresh and enrich the user's head and face while cooled by the face fans. The enriched-O<sub>2</sub> air can also be enhanced with humidity, salt air and/or aromas. A facial sprayer system is also included for facial services enhanced with refreshing and soothing O<sub>2</sub> while the user experiences whole body wellness sessions.

### Integrated FitBed™ HIIT Exercise System

The POD includes a patented built-in exercise fitness system featuring isotonic-isometric resistance bands of two different resistance levels with cushioned grips. Users can perform high-intensity interval exercises while enjoying their session ('Active Thermal Exercise') for hyper-thermic fitness, conditioning and heat acclimation wellness benefits. Exercise resistance bands may be easily changed to provide from low to high resistance for all levels of fitness sessions, from poorly conditioned, out-of-shape to elite professional.

### LED Pedestal & Privacy Visor

A matching illuminated LED Pedestal design specifically for the **RelaxWell POD Deluxe** raises the POD 14" in height. The matching translucent privacy visor can be extended over the head & face for greater seclusion and serenity.

LED Pedestal

# eScapes™ Interactive Guided Reality Suites

The smart wellness software includes a series of exciting and motivational images and messages conducive to body and mind wellness applications. The user can select from eScapes imagery for complementary entertainment, information and powerful visual enhancement of their wellness goals.

## Interactive Guided Reality

The **RelaxWell POD Deluxe's** color LCD controls and interactive wellness technologies and exercise modalities integrated with visual imagery to enhance a myriad of wellness applications. The **RelaxWell POD Deluxe** is the first personalized delivery system in the world to integrate wellness guided imagery with the physical modalities of convective dry heat, radiant infrared heat, massage vibration, aromatherapy and exercise resistance tubes. The proprietary eScapes™ software enables users to enhance and precipitate a positive psychologic and physiologic wellness response with visual wellness images synchronized to guide long-term and short-term memory for use of the mind to enhance physical function and promote overall well-being. Interactive guided imagery facilitates and complements a variety of holistic wellness programs with specific exercises, specific modalities and specific images.

### Guided Reality Images:

Relaxation scenes, Fitness Exercises, Weight Management guidance, Pain Relief, Yoga & Flexibility, & Positive Inspiration.

### Wellness applications:

Stress management, weight management, fitness programs, sleep, muscle relief, body esthetics, mobility & flexibility, body & mind well-being, and athletic peak performance.

## eScapes Fitness

**RelaxWell POD Deluxe's** new visual eScapes software enables you to experience fitness training for any fitness level while enjoying an **RelaxWell POD Deluxe** session. The RELaxwell POD Deluxe includes a patented built-in exercise fitness system featuring dynamic resistance bands of two different resistance levels with cushioned grips. The exercise program combines heat (hyperthermic conditioning) with high-intensity interval training (HIIT) for the ultimate in fitness efficiency and efficacy. With the FIT-Bed Guided Workout sessions users can perform High Intensity Interval Training (HIIT) exercises (Active Thermal Exercise) while enjoying their POD sessions for improved fitness and heat acclimation. During your session, you will be instructed on the appropriate exercises, number of repetitions and duration of rest periods for your fitness level (beginner, intermediate or advanced). Exercise resistance bands can be easily and quickly changed or provide from low to high resistance for all levels of fitness sessions, from out-of-shape to elite professionals. The **RelaxWell POD Deluxe** hyperthermic-fitness exercise encourages from simple to advanced exercise as a part of a healthy wellness lifestyle to help users experience important exercise and wellness benefits.

**FIIT - FITNESS INTENSITY INTERVAL TRAINING**

SELECT your fitness level:

**BEGINNER**   **INTERMEDIATE**   **ADVANCED**

2. Bicep Curls
3. Leg Raises
4. Front Arm Raises
5. Arm Crossovers
6. Reverse Curls
7. Stomach Crunches
8. Flutter Kicks

## eScapes Relaxation

The visual eScapes software utilizes a beautiful array of engaging images for soothing relaxation suites while the user enjoys the warmth and comfort within the heated chamber. Users can select from eight (8) different categories of relaxing images (i.e. beach scapes, desert scapes, floral scapes, night sky, etc.) to enhance the session with the power of guided reality imagery.

## eScapes Hot Yoga/Flexibility/Mindfulness

**RelaxWell POD Deluxe's** new visual eScapes software enhances your yoga practice with a series of visual instructions and images displaying a number of yoga/flexibility postures and breathing exercises conducive to the heated environment of the **RelaxWell POD Deluxe**. Instructional and motivational messages and images are displayed on the color monitor to guide you as you perform these effective hot yoga mindfulness movements.

**Modified Fish Pose**

- Arch lower back using hands and forearms for support.
- Keep head and shoulder flat on bed and hold for 30 seconds.

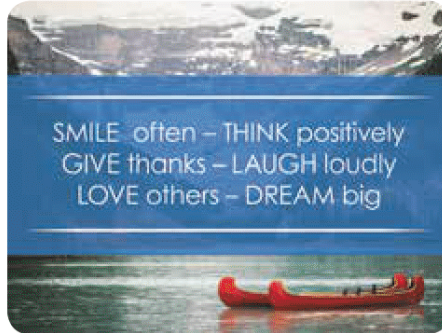

YOGA & FLEXIBILITY

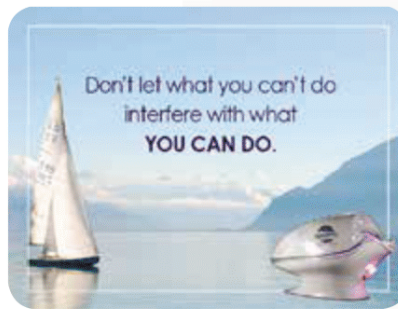

## eScapes Positive Inspiration

**RelaxWell POD Deluxe** includes short, positive and uplifting quotations and inspirational messages that are beautifully displayed in sequence to help complement and enhance serene mindfulness and inspiring motivation while enjoying a Wellness session. The user can choose from two sets of Positive Inspiration messages and pause the images at any time for greater reflection or allow the auto-sequencing of the entire suite.

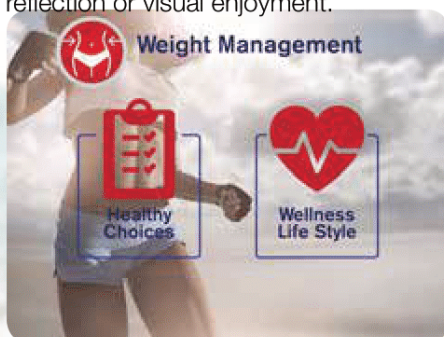

## eScapes Muscle Relief

Visual messages present thoughtful statements, meditations, tips and choices intended for helping enhance awareness of healthy lifestyle skills to help fitness recovery and relieve aching muscles, and/or may help to enhance wellness and living well by encouraging healthy activities and mindfulness.

## eScapes Weight Management

Two guided image suites of weight management information slides - **HEALTHY CHOICES** or **WELLNESS LIFE STYLE**, provide colorful and interesting visuals with healthy lifestyle quotes and facts about how to promote or maintain a healthy weight, encourage healthy eating, or assisting with weight loss goals. The suites auto-sequence during the wellness session or can be paused for reflection or visual enjoyment.
